Overview ...

Online Retail Industry is growing tremendously during these difficult economic conditions. More and more businesses want to save infrastructure costs by selling their products and services online.

Businesses will get exposed to more geographic areas and can get customers from across the world. Businesses can sell their products and services 24 x 7 and 365 days a year. No need to worry about changing weather patterns and unexpected weather conditions.

With our easy to use and easy to manage **Retail On Net** product businesses can start selling their products within days and even some times less than a week.

Retail On Net comes with

- Built-In Products Management,
- Categorization of Products in any way any business may need,
- Sell Bundled Products
- Offer your customers a customization option for Bundled Products
- Order Management,
- Customer Management,
- Search Engine Optimization Capabilities,
- Setup Coupons,
- Shipping Restrictions to avoid accidental shipping of any products to restricted states,
- Send News Letters to Registered Customers etc.
- Accept all major credit cards online with our built-in merchant gateway integration. Merchant Gateway Accounts will be provided from Authorize.net

Retail On Net can pull data from Microsoft Retail Management System (POS). Our team can integrate with any other POS you may already be using.
