Overview ...

Online Streaming Media Industry is growing tremendously during this digital age. More and more media businesses want to reach more and more customers and deliver their content in various formats and deliver content to various devices such as IPTV Boxes, Mobile Phones etc.

Businesses will get exposed to more geographic areas and can get customers from across the world. Businesses can sell their products and services 24 x 7 and 365 days a year.

With our easy to use and easy to manage **Streaming Media Store** product, media businesses can start selling their videos, movies or live channels within days and even some times less than a week.

Team Tranquil will offer Media Streaming Solutions such as media encoding, setup streaming server, integration with various content delivery networks or setup your own content delivery network. DRM based encoding and content delivery, application development for various platforms such as Roku, iPhone, iPad, Windows Phone 7, Android etc.
